Career Objective

Seeking opportunities as a Senior Android Engineer or Web Front-End Developer, leveraging over 7 years of experience in mobile and web development.

Professional Summary

Highly adaptable Senior Android Developer with over 7 years of experience delivering scalable mobile applications. Proficient in all phases of development, from architecture and design to deployment. Recently expanded expertise in web technologies including Next.js, ReactJS, and TypeScript to meet team requirements, as well as proficiency in Embedded C++ and CMake for embedded systems needs. These experiences demonstrate strong flexibility, quick learning, adaptability, and commitment to supporting team goals. Passionate about mentoring team members, fostering collaboration, and driving innovation. Skilled in ensuring optimal performance, efficient workflows, and cross-functional team collaboration.

PROFESSIONAL EXPERIENCE

Senior Software Engineer

RAJA SOFTWARE LABS, BANER PUNE, June 2018 – Present

- Designed and developed high-quality Android applications, ensuring smooth performance and scalability.
- Collaborated with cross-functional teams to define, design, and ship new features.
- Experienced working with modern Android frameworks such as Jetpack Compose.
- Wrote clean, testable, and efficient code in Kotlin and Java, while incorporating best practices.
- Maintained code quality through unit testing, integration testing, and code reviews.
- Utilized modern development tools such as Git, Android Studio, and CI/CD pipelines.
- Trained junior developers and contributed to knowledge-sharing initiatives in the team.
- Integrated third-party APIs and managed databases such as SQLite, Realm, and MySQL.
- Gained proficiency in web technologies like JavaScript, TypeScript, Next.js, and ReactJS for front-end development to address team project requirements, showcasing quick adaptability.
- Acquired skills in Embedded C++ and CMake to support embedded systems integration needs, highlighting flexibility and team collaboration.

Skills: Kotlin, Java, Android Development, Jetpack Compose, TypeScript, JavaScript, Next.js, ReactJS, C/C++, CMake, CI/CD, Git, API Integration, Database Management, Mobile Architecture, Mentorship

Android/iOS developer

GENORA INFOTECH, VERNA GOA, August 2016 – June 2018

- Designed and developed mobile applications for both Android and iOS platforms.
- Translated UI/UX designs into efficient, reusable, and scalable code.
- Collaborated with the QA team to ensure application quality and fix bugs as needed.
- Mentored and trained junior Android and iOS developers, improving team productivity.

- Implemented reactive programming using Rx Swift and RxJava.
- Worked in an Agile environment and followed strict release cycles.

Skills: Android Development, iOS Development, Reactive Programming, Rx Swift, RxJava, SQLite, Realm, Agile Methodologies, Cross-Platform Development

Android developer Intern

LETSAPP, PANAJI GOA, January 2015 – April 2015

- Built Android applications, including an Entry Register app using QR code scanning.
- Developed an XML parsing app as part of the internship.

Skills: Android Development, Java, QR encode/decoding, XML Parsing, Mobile App Prototyping

SKILLS

Core Technical Skills

- **Languages:** Java, Kotlin, Swift, Objective-C, Python, C/C++ (including Embedded C++), JavaScript, TypeScript
- **Mobile Development:** Android (Jetpack Compose, Kotlin, Java), iOS (Swift, Objective-C)
- **Web Development:** Next.js, ReactJS, Django, HTML, CSS, REST, XML, JSON
- **Databases:** SQLite, Realm (NoSQL), Postgres DB, MySQL
- **Tools & Platforms:** Git, Android Studio, CI/CD, CMake, Linux (Arch Linux, Ubuntu, Mint), macOS, Windows

EDUCATION

- B.E. Computer Engineering, Goa College of Engineering (2012-2016)
- DVM's PVS Kushe Higher Secondary School (2010-2012)
- Ramakant D. Khalap High School (2004-2010)

LANGUAGES

- English (Professional Working Proficiency)
- Marathi (Native)
- Konkani (Native)
- Hindi (Professional Working Proficiency)
